Kardelen Aldemir

Computer Engineering Graduate | Game, Web & Mobile Software Developer
Izmir, Türkiye | +90 543 887 7445 | kardelena0057@gmail.com | github.com/kardelenaldemir

PROFESSIONAL SUMMARY

Computer Engineering graduate focused on game, mobile, and web development. Developed Unity and Ren'Py projects involving level design, gameplay flow, branching dialogue, player choices, and multiple story outcomes. Also experienced with Kotlin, React Native, Node.js, REST APIs, databases, BLE, and backend development.

EXPERIENCE

Software Development Intern | Yaşar Bilgi Sistemleri - New Technologies and Mobility Department **06/2026 - 07/2026**

• Worked on mobile and web development, REST API integration, testing, debugging, and Git-based version control.

EDUCATION

B.Sc. in Computer Engineering | Yaşar University, Izmir **2020 - 07/2026**

Graduated on July 27, 2026.

TECHNICAL SKILLS

Programming Languages: Kotlin, Dart, JavaScript, Java, Python, C, C++, SQL
Game Development: Unity, C#, Ren'Py, narrative design, branching dialogue, level design, gameplay logic
Web & Backend: HTML5, CSS3, React, Node.js, Tailwind CSS, Spring Boot, FastAPI, REST APIs, SMTP
Mobile Development: React Native, Android Studio, Jetpack Compose, Kotlin, Dart, Retrofit, BLE
Databases & Tools: PostgreSQL, TimescaleDB, SQLAlchemy, Git, GitHub, Docker, Arduino, Wokwi

SELECTED PROJECTS

Damnation | Unity, C# | Narrative Game **09/2025 - 01/2026**

• Built levels in Unity for a narrative game with branching dialogue, character interactions, and multiple outcomes.
• Worked mainly on level design, gameplay flow, playtesting, and debugging.

FateMatch | Ren'Py, Python | Fantasy Otome Game

• Created a fantasy otome game in Ren'Py with romance routes, branching dialogue, player choices, and multiple endings.
• Wrote and structured scenes, dialogue, character routes, and choice-based story progression.

BPSync | Kotlin, Jetpack Compose, FastAPI, PostgreSQL, TimescaleDB, BLE, ML **09/2025 - 05/2026**

• Built an Android health-monitoring system that connects to two wearable sensor modules through BLE and stores time-series data through a FastAPI backend.
• Developed BLE data transfer, Retrofit API integration, authentication, dashboards, reports, and blood-pressure prediction features.
Repository: github.com/kardelenaldemir/BPsync

GelinlikOS.com | Web-Based Bridal Shop Management Platform **2026**

• Built a web application for bridal shops to manage customer records, measurements, and garment categories, with downloadable customer and measurement documents.

YomYom | React Native Mobile Application **2026**

• Built a React Native fitness app where the user's avatar changes as progress is recorded.
• Designed the progress tracking flow around fitness goals, visual feedback, and character progression.

LEADERSHIP & ACTIVITIES

Board Member | HeForShe **Yaşar University**

• Helped organize university awareness activities and student events.

LANGUAGES

Turkish: Native
English: Fluent (written and spoken)
